MESSAGE FROM THE SECRETARY

The Davis-Bacon and Related Acts provide prevailing wage protection to workers on Federal construction projects. These laws require the payment of locally prevailing wage rates and fringe benefits to employees of contractors or subcontractors performing work on federally financed or assisted construction projects valued in excess of \$2,000.

Proper administration of the employee protection provisions of the Davis-Bacon and Related Acts depends on the effective dissemination of prevailing wage rate information. In support of this process, I am pleased to announce the release of the fifth edition of General Wage Determinations Issued Under The Davis-Bacon And Related Acts. This publication presents all current Davis-Bacon general wage determinations in a readily available three-volume reference book. It sets forth prevailing wage rates for laborers and mechanics engaged in various construction occupations in the majority of counties across the Nation. Weekly supplements to this publication will be issued to ensure that it contains the most up-to-date information available.

The fifth edition of General Wage Determinations represents the results of extensive research into the wage rates which are being paid in the construction industry. The information it contains will assist all who are concerned with the effective administration of the Davis-Bacon and Related Acts.

Elizabeth Dole
Secretary of Labor

PREFATORY NOTE

The Wage and Hour Division of the Employment Standards Administration issues general wage determinations under the Davis-Bacon Act for areas with a substantial amount of Federal or federally assisted construction where wage patterns for a particular type of construction are well established.

Because of its wide circulation and initial low cost, the Federal Register served for many years as the medium for communicating such information. In recent years, in order to reduce the volume of printed material in the Federal Register, alternative formats were used. These changes, however, led to problems in locating, interpreting, filing, and duplicating published Davis-Bacon general wage determinations. Use of General Wage Determinations Issued Under The Davis-Bacon And Related Acts remedies these problems.

Although publication of wage determinations in the Federal Register has ceased, weekly Federal Register notice of new general wage determinations and those being modified or superseded is being continued.

The General Wage Determinations publication offers significant improvements over previously used formats. For example, it features simplified access to wage determination information, expanded space between text areas, larger print, and heavier paper. Also, its loose-leaf form facilitates maintenance of up-to-date information.

Development and continued use of this publication is an example of this Department's commitment to improving the administration of the Davis-Bacon and Related Acts.

It also furnishes information on how to use General Wage Determinations. The Appendix provides the answers to several of the most frequently asked questions concerning administration of the Davis-Bacon and Related Acts.

This publication will be of great assistance to those federal agencies and recipients of federal assistance who are responsible for incorporating Davis-Bacon wage determinations into construction contracts.

Users of this fifth edition are invited to suggest ideas for improvement of the publication by submitting them to the U.S. Department of Labor, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S-3014, Washington, D.C. 20210.

INTRODUCTION

Davis-Bacon and Related Acts (DBRA)

The Davis-Bacon Act, as amended, requires that each contract over \$2,000 to which the United States or the District of Columbia is a party for the construction, alteration, or repair of public buildings or public works contain a clause setting forth the minimum wages to be paid to various classes of laborers and mechanics employed under the contract. Under the provisions of the Act, contractors or their subcontractors are to pay workers employed directly upon the site of the work no less than the locally prevailing wages and fringe benefits paid on projects of a similar character. The Davis-Bacon Act directs the Secretary of Labor to determine such local prevailing wage rates.

In addition to the Davis-Bacon Act itself, Congress has added prevailing wage provisions to approximately 60 statutes which assist construction projects through grants, loans, loan guarantees, and insurance. These "Related Acts" involve construction in such areas as health, housing, air and water pollution and transportation. If a construction project is funded or assisted under more than one Federal statute, the Davis-Bacon prevailing wage provisions may apply to the project if any of the applicable statutes requires payment of Davis-Bacon wage rates.

The geographic scope of the Davis-Bacon Act is limited, by its terms, to the 50 states and the District of Columbia. By the same token, the scope of each of the Related Acts is determined by the terms of the particular statute under which the Federal assistance is provided. For example, Davis-Bacon prevailing wage provisions would apply to a construction contract located in Guam or the Virgin Islands funded under the Housing and Community Development Act of 1974, even though the Davis-Bacon Act itself would not apply.

Wage Determinations

A "wage determination" is the listing of wage rates and fringe benefit rates for each classification of laborers and mechanics which the Administrator of the Wage and Hour Division of the Department of Labor has determined to be prevailing in a given area for a particular type of construction (e.g., building, heavy, highway, or residential). The Wage and Hour Division (the Division), issues two types of wage determinations: general determinations, also known as area determinations, and project determinations. The term "wage determination" is defined as including not only the original decision but any subsequent decisions modifying, superseding, correcting, or otherwise changing the rates and scope of the original decision.

General Wage Determinations reflect those rates determined by the Division to be prevailing in a specific geographic area for the type of construction described. The general wage decisions contain no expiration date and remain in effect until modified, superseded, or withdrawn. General wage determinations are usually issued whenever the wage patterns for a given location, for a particular type of construction, are well settled and it appears there will be a recurring need for determined rates. If a contracting agency has a proposed construction project to which a general determination would be applicable, the published determination may be used by the contracting agency without consulting the Department of Labor.

As of 1987, about one-half of the counties in the United States were covered by general wage determinations for building construction. General determinations for highway construction applied to nearly all areas, and approximately three-quarters of the counties were encompassed by general wage determinations for heavy construction. Few general determinations are issued for residential construction.

Project Wage Determinations are issued at the specific request of a contracting agency; are applicable to the named project only; and expire 180 calendar days from the date of issuance unless an extension of the expiration date is requested by an agency and approved by the Division. If such a determination is not used in the period of its effectiveness, it is void. Project determinations are issued in response to contracting agencies submitting to the Division a Standard Form 308 requesting a wage determination.

Modifications of general and project wage determinations are issued to update certain data in the original determination. If publication occurs less than 10 days prior to bid opening, and the agency finds that there is not sufficient time still available before bid opening to notify bidders of the modification, it may be disregarded. If a contracting officer chooses to disregard a modification, a report of this action

shall be inserted in the contract file and made available to the Division upon request.

If a contract has not been awarded within 90 days after bid opening, or in case of projects under the National Housing Act, construction has not begun 90 days after initial endorsement or the signing of the agreement to enter into a housing assistance payments contract, any modifications published to a general wage determination prior to award of the contract or beginning of construction, as appropriate, shall be effective with respect to that contract unless the agency requests and obtains an extension of the 90-day period from the Division.

Supersedeas Wage Determinations are issued annually to bring up to date the provisions of all general decisions. Supersedeas decisions affecting general determinations are effective under the same circumstances as "modifications". However, the difference between modification and supersedeas is that the modification allows an existing wage decision to remain active, as modified, whereas the latter supersedes an existing wage decision and, therefore replaces it.

Legal Basis And Application

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages

determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act and pursuant to the provisions of 29 CFR Part 1. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

General wage determination decisions contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable DBRA Federal prevailing wage law and 29 CFR Part 5. The wage rates contained herein must be the minimum paid by contractors and subcontractors to laborers and mechanics.

Modifications and Supersedeas Decisions to General Wage Determinations

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

Such decisions contain no expiration date and are effective from the date that notice of such decisions is published in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W. - Room S-3014, Washington, D.C. 20210.

How General Wage Determinations
Is Organized

General Wage Determinations is organized into four major sections:

I. INTRODUCTION - pages xi to xvii

This section includes a short discussion of the Davis-Bacon and Related Acts and their requirements. It gives a brief explanation of wage determinations and their use and provides the legal basis for application of general wage determinations. In addition, it explains how General Wage Determinations (GWD) is organized and distributed, and how to locate and understand a particular general wage determination.

II. LISTINGS OF GENERAL WAGE DETERMINATIONS BY LOCATION, NUMBER, AND PAGE - pages xix to xxxii

There are two listings of general wage determinations included in this volume. The first furnishes a comprehensive listing of all U.S. counties for States covered by this volume. For each county, it lists the current general wage determination numbers for the major types of construction (building, heavy, highway, residential). Blank entries indicate no current general wage determination is applicable. The second listing includes all current general wage determinations in numerical order, with corresponding GWD page numbers.

III. GENERAL WAGE DETERMINATIONS - pages 1 to 447

The general wage determinations contained in this volume are arranged by State, county, and type of construction.

IV. APPENDIX-pages-A-1 to A-10

This section includes the answers to several of the most frequently asked questions about administration of the Davis-Bacon and Related Acts.

How To Locate and Interpret
General Wage Determinations

To find the wage determination of interest:

- . Locate the State and county in the listing of General Wage Determinations by Location, which begins on page xix.
- . Obtain the wage determination number listed to the right of the relevant county and under the appropriate type of construction.
- . Turn to the Listing of General Wage Determinations by Number, which begins on page xxxi. It is arranged first by State abbreviation.
- . Within States, wage determinations are listed in numerical order.
- . Obtain the page number on which the wage determination is found by identifying the number listed directly to the right of the wage determination number.
- . Turn to the page number identified.

The format used to present wage determinations may be divided into three parts:

1. Each wage determination begins with a cover sheet that defines its applicability. Included on this sheet are:
 - . The decision number
 - . The number of the decision superseded
 - . State(s) covered
 - . County(ies) or city(ies) covered
 - . Type of construction (building, heavy, highway, and/or residential)
 - . Description of the construction covered and/or excluded from coverage
 - . Record of modifications, including number, date, and GWD pages affected.
2. Each wage determination includes a listing of classifications (laborers and mechanics), along with their basic hourly wage rate and fringe benefit rate. In some cases, classification listings may include occupational definitions, and a description of the geographical coverage of the particular wage and fringe benefit rates.
3. Many wage determinations conclude with footnotes, classification definitions, and descriptions of the geographic areas covered by specific classifications.

Questions And Answers
On The Use of Davis-Bacon Wage Determinations

1. **Questions:** How do I obtain a wage determination for a construction project to be performed at a location not covered by a published determination?

Answer: If no general wage determination is listed for a given county and type of construction, use the following procedure to obtain a project wage determination:

The Federal agency funding or financially assisting the construction project requests a wage determination under the Davis-Bacon Act or any of the related prevailing wage statutes by submitting a Standard Form (SF) 308 to the following address:

U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Branch of Construction Wage Determinations, 200 Constitution Avenue, N.W., Room S-3504, Washington, D.C. 20210.

The agency shall check only those craft classifications on the SF-308 which will be needed in the performance of the work. Inserting a note such as "entire schedule" or "all applicable classifications" is not sufficient. Additional classifications needed which are not printed on the form must be typed in the blank spaces or on a separate list and attached to the form.

In completing an SF-308, the agency must furnish:

- (1) A sufficiently detailed description of the project to indicate the type of construction involved. Additional descriptions or separate attachments, if necessary for identification of the type of project, must be furnished.
- (2) The county (or other civil subdivision) and State in which the proposed project is located.

Requests for wage determinations should be accompanied by any pertinent wage payment information which may be available. When the requesting agency is a State highway department under the Federal-Aid Highway Acts (See 23 U.S.C. 113), the agency should also include its recommendations as to the wages which are prevailing for each classification

- (4) There is evidence of agreement on the classification and proposed wage rate among the parties involved; and
- (5) The request does not involve wage rates for apprentices or trainees.

If the contracting officer believes that these criteria are not met, the classification or wage rate may not be approved but shall be referred to the Wage and Hour Division for resolution of dispute.

All conformance notices will be responded to in writing within 30 days of receipt. These responses either approve or deny the request or inform the submitting agency that additional time will be required. Failure to receive a response does not constitute approval. If a response is not received, the Wage and Hour Division must be contacted directly. Every conformance request is analyzed to verify that the criteria for approval are complied with.

3. **Question:** How do workers on a construction site know that a project is covered by the Davis-Bacon Act? How do they know the prevailing wage to which they are entitled?

Answer: The wage determination (including any additional classifications and wage rates conformed) and a Davis-Bacon poster (WH-1321) must be posted at all times by the contractor and its subcontractors at the site of the work in a prominent and accessible place where it can be easily seen. The WH-1321 poster may be obtained at no charge from offices of the Wage and Hour Division. In the absence of such posted information, any person who wants to determine if the project is covered should contact the federal agency funding or assisting the project or the Wage and Hour Division.

4. **Question:** Once construction has begun, are the workers' wage rates affected when the wage determination for the area in which the project is located is changed?

Answer: As a general rule, the wage determination incorporated into a bid solicitation and related contract award establishes the minimum wage rates and fringe benefits which must be paid for the entire term of the contract.

Trainees employed must be persons registered in a construction occupation under a program which has been approved in advance by the U.S. Department of Labor, Employment and Training Administration, as meeting its standards for on-the-job training programs and which have been so certified by that Administration. Note that information on wage rates paid to apprentices and trainees is not solicited nor do the wage determinations issued include apprentice classifications. Similarly, their addition through the additional classification procedure (conformance) is neither necessary nor appropriate. On projects funded by the Federal Aid Highway Act, apprentices and trainees certified by the Secretary of Transportation are not covered by Davis-Bacon labor standards.

The proper wage rates to be paid to apprentices and trainees are those specified by the particular programs in which they are enrolled, expressed as a percentage of the journeyman rate on the wage determination. In the event employees reported as apprentices or trainees on a covered project have not been properly registered within the meaning of the Regulations and the contract stipulations, or are utilized at the job site in excess of the ratio to journeymen permitted under the approved program, they must be paid the applicable wage rates for laborers and mechanics employed on the project performing the kind or classification of work they actually performed, regardless of of work classifications which may be listed on the submitted payrolls and regardless of their level of skill.

Under existing regulations, helper classifications are not listed in wage determinations or approved as an additional classification unless certain criteria are present: 1) the use of helpers is an established prevailing practice; 2) the duties of the helper are clearly defined and distinct from the duties of the journeyman classification; 3) their duties are distinct from the duties of the laborers, and 4) the "helper" is not synonymous with "trainee" in an informal training program. Helpers can only be employed on a Davis-Bacon project at wage rates less than those specified for a given craft classification if the applicable

start of construction where there is no award (or the date of initial endorsement under the National Housing Act or date of the housing assistance payments agreement under Section 8 of the U. S. Housing Act of 1937).

An "interested person" is considered to include, without limitation:

- (1) Any contractor, or an association representing a contractor, who is likely to seek or to work under a contract containing a particular wage determination, or any laborer or mechanic, or any labor organization which represents a laborer or mechanic, who is likely to be employed or to seek employment under a contract containing a particular wage determination, and,
- (2) Any Federal, State, or local agency concerned with the administration of a proposed contract or contract containing a particular wage determination issued pursuant to the Davis-Bacon Act or any of its related statutes.

The Wage Appeals Board was established by the Secretary of Labor in 1963 to decide, at its discretion, appeals concerning questions of fact and law related to final decisions of the Wage and Hour Division concerning:

- o Controversies concerning the payment of prevailing wage rates or proper classifications which involve significant sums of money, large groups of employees, or novel or unusual situations;
- o Wage determinations issued under the Davis-Bacon and related Acts;
- o Debarment cases arising under 29 CFR Part 3;
- o Cases involving the assessment of liquidated damages under the Contract Work Hours and Safety Standards Act;
- o Appeal of any other final decision by the Employment Standards Administration.

The Board consists of three members, one of whom is designated chairman. The members are appointed by the Secretary of Labor and a majority vote of the Board is necessary for decision, except that a decision to hear any
